Project Proposal (Proposed Solution) report

The proposal report aims to transform loan approval using machine learning, boosting efficiency and accuracy. It tackles system inefficiencies, promising better operations, reduced risks, and happier customers. Key features include a machine learning-based credit model and real-time decision-making.

Project Overview	
Objective	The primary objective is to assist users in initiating and maintaining professional conversations by generating personalized networking suggestions using AI and NLP techniques.
Scope	The project analyzes event descriptions and user interests to identify discussion topics, generate conversation starters, verify information, and store interaction history for future use.
Problem Statement	
Description	Many professionals, students, and job seekers struggle to initiate convers meaningful relationships during networking events due to lack of confident discussion topics.
Impact	Solving this problem improves networking confidence, enhances professional interactions, and increases opportunities for collaboration, career growth, and knowledge sharing.
Proposed Solution	
Approach	Employ Artificial Intelligence, Natural Language Processing (NLP), FastAPI, and Streamlit to analyze event information, detect relevant topics, and generate personalized conversation starters.
Key Features	- AI-based event analysis and topic detection. - Personalized conversation starter generation. - Fact verification using Wikipedia API. - Conversation history tracking. - User feedback collection. - Interactive Streamlit interface. - REST API documentation using Swagger UI.

Resource Requirements

Resource Type	Description	Specification/Allocation
Hardware		
Computing Resources	CPU/GPU specifications, number of cores	Intel Core i5 Processor
Memory	RAM specifications	8 GB
Storage	Disk space for data, models, and logs	256 GB SSD
Software		
Frameworks	Python frameworks	FastAPI, Streamlit
Libraries	Additional libraries	Transformers, Torch, Wikipedia-API, ReportLab, PyTest, Requests
Development Environment	IDE	Visual Studio Code
Data		
Data	Source, size, format	User-provided event descriptions and interests, JSON files (history.json, feedback.json)
