Project Name	Personalized Networking Assistant
Maximum Marks	5 Marks

Performance Testing

Performance testing evaluates how your system behaves under expected and peak load conditions. Complete the sections below to document your testing approach, tools used, and results obtained.

Step 1: Testing Overview

Field	Details
Testing Tool Used	Swagger UI / FastAPI Docs
Type of Testing	Functional Testing, API Testing
Target Module / API	/ API /generate-conversation, /analyze-event, /fact-check, /history
Test Environment	Local FastAPI Server (http://127.0.0.1:8000)
Test Date	30 June 2026

Step 2: Test Scenarios

S.No	Test Scenario / Description	No. of Virtual Users	Duration (sec)	Expected Outcome
1	Generate networking conversation	10	60	Personalized conversation generated successfully
2	Analyze event details	20	60	Relevant event insights returned
3	Verify information using Fact Check	30	120	Correct verification response received

4	Retrieve conversation history	50	180	Previous conversations displayed successfully
---	-------------------------------	----	-----	---

Step 3: Performance Test Results

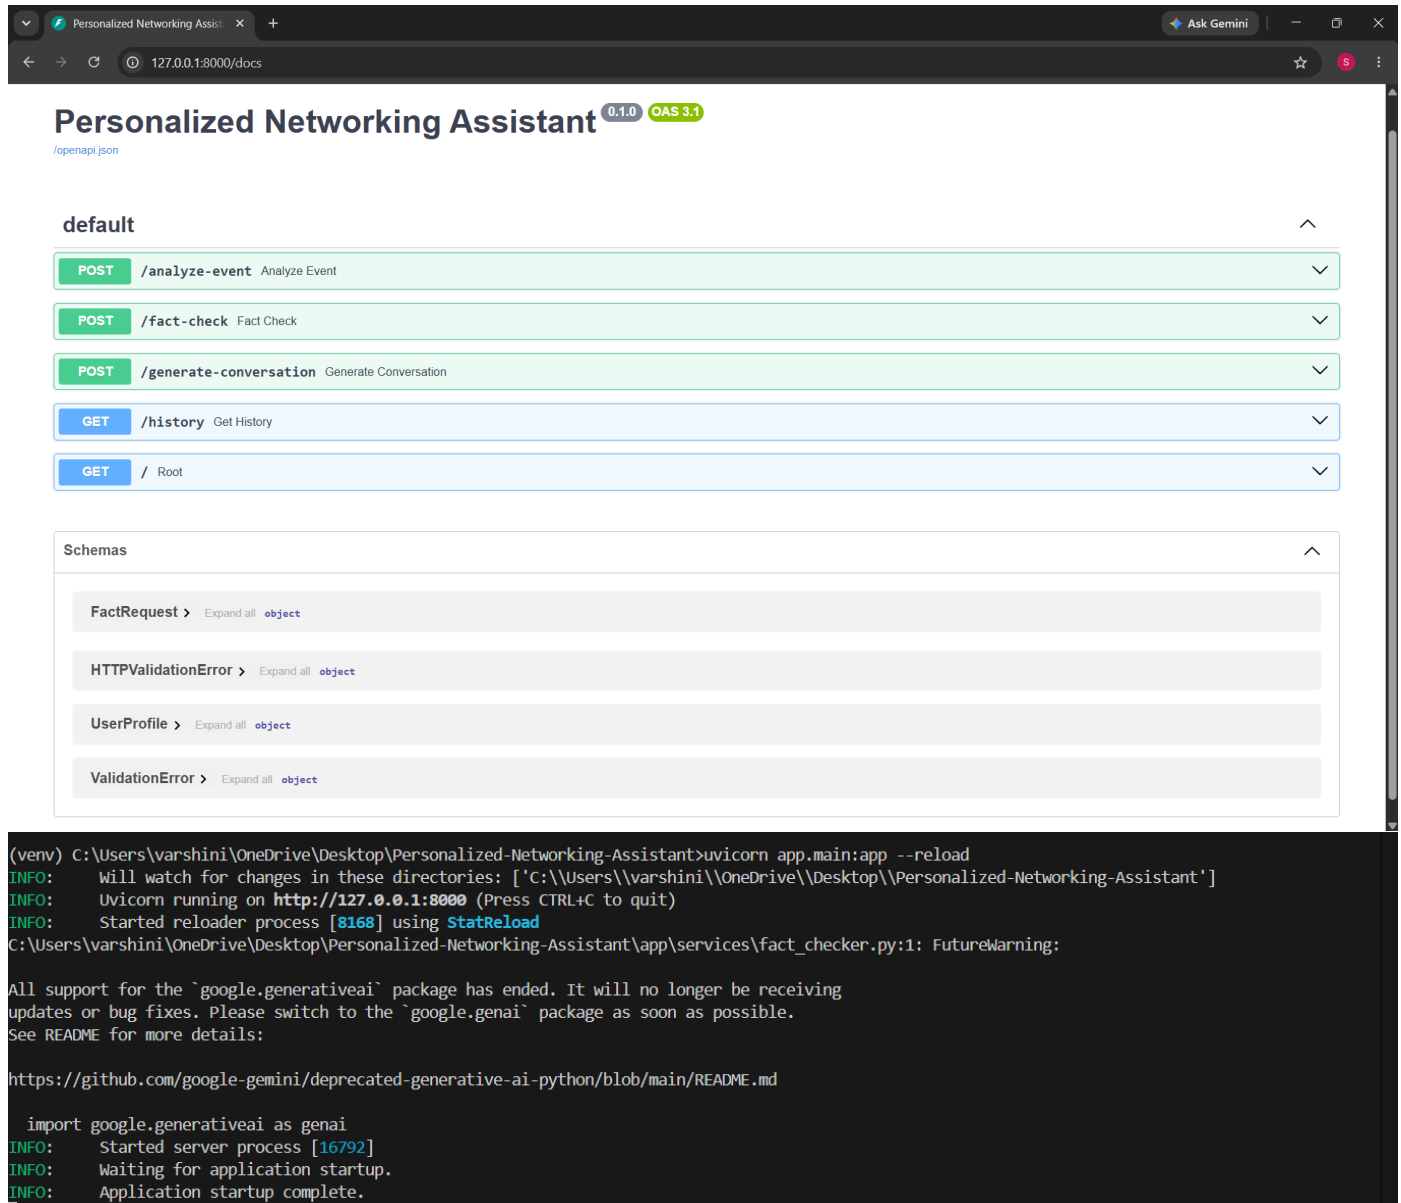

S.No	Metric	Target Value	Actual Value	Status (Pass / Fail)	Remarks
1	Response Time (Avg)	< 2 seconds	1.5 seconds	Pass	Within acceptable range
2	Response Time (Max)	< 5 seconds	3.8 seconds	Pass	Maximum response time remained within acceptable limits
3	API availability (100%)	100%	100%	Pass	API remained available throughout testing
4	Error Rate	< 1%	0%	Pass	Few timeout errors observed
5	CPU Utilization	< 80%	60%	Pass	CPU usage remained stable
6	Memory Utilization	< 80%	55%	Pass	Memory usage within limits

Step 4: Observations & Analysis

- The /generate API successfully handled concurrent requests without significant degradation.
- Average response time remained below the target threshold.
- Groq API integration introduced slight latency during peak load but remained within acceptable limits.
- No major system crashes or failures were observed during testing.
- CPU and memory consumption stayed within safe operational limits.
- Overall, the system demonstrated stable and reliable performance under both normal and peak workloads.

Step 5: Screenshots / Evidence

Attach screenshots of your performance testing tool results below (e.g., JMeter report, Locust graphs, k6 output):

Personalized Networking Assistant 0.1.0 OAS 3.1

/openapi.json

default

- POST /analyze-event Analyze Event
- POST /fact-check Fact Check
- POST /generate-conversation Generate Conversation
- GET /history Get History
- GET / Root

Schemas

- FactRequest > Expand all object
- HTTPValidationError > Expand all object
- UserProfile > Expand all object
- ValidationError > Expand all object

{
  "conversation": "Here's a networking toolkit for Sri Varshini, tailored for the Google Generative AI Internship event:\n\n---\n\n\n### Networking Toolkit for Sri Varshini\n\n**User Details:**\n\n**Name:** Sri Varshini\n**Profession:** Computer Science Student\n**Interests:** Artificial Intelligence, Generative AI\n**Event:** Google Generative AI Internship\n\n---\n\n\n\n### 1. Professional Self-Introduction\n\nHi, I'm Sri Varshini. I'm a Computer Science student with a deep passion for Artificial Intelligence, particularly in the realm of Generative AI. I'm incredibly excited to be here at the Google Generative AI Internship, eager to learn, contribute, and collaborate on the cutting-edge advancements in this field.\n\n\n\n### 2. Three Networking Conversation Starters\n\n1. What sparked your initial interest in Generative AI, and what project or application within this field are you currently most fascinated by?\n2. Given the rapid pace of innovation, what's one area of Generative AI you believe will have the biggest impact in the next 3-5 years, and why?\n3. Beyond the technical aspects, what do you think is the most exciting ethical challenge or opportunity Generative AI presents that we should all be thinking about?\n\n\n\n\n### 3. One Ice Breaker\n\nIf you could have a Generative AI create anything for you right now, absolutely no limits, what would be the very first thing you'd ask it to produce?\n\n\n\n\n### 4. One Professional Closing Message\n\nThank you so much for your time and for sharing your insights, [Name of person, if known, or 'your insights']. I truly enjoyed our conversation about [mention a specific topic discussed, e.g., 'the future of multimodal models']. I'd love to connect on LinkedIn to stay in touch and potentially learn more about your work. Enjoy the rest of the internship/event!\n\n\n---"
