

Scalability & Future Plan

Date	3 July 2026
Team ID	xxxxxx
Project Name	Personalized Networking Assistant
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Supports a limited number of users on a single server	Deploy on cloud infrastructure (AWS, Google Cloud, Azure) with load balancing and auto-scaling
2	Data Storage	Basic storage for user profiles and recommendations	Implement scalable databases such as MongoDB or PostgreSQL with cloud storage support
3	Performance	AI recommendations are generated in realtime for each request	Use caching mechanisms, asynchronous processing, and optimized AI inference pipelines
4	Security	Basic authentication and API security	Implement JWT authentication, OAuth login, HTTPS, encrypted database storage, and role-based access control (RBAC).

Current System Limitations:

S.No	Limitation	Impact	Priority to Address
1	Limited support for concurrent users	System performance may degrade with many users accessing simultaneously	High
2	Limited integration with external professional platforms	Restricts networking opportunities and profile enrichment	High
3	No long-term storage of networking interactions and recommendations	Users cannot access previous recommendations or track networking progress	Medium

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 2	LinkedIn, GitHub, and portfolio integration	2 Months	Better profile matching and personalized networking recommendations.
Phase 3	AI conversation starters, meeting scheduler, and email drafting	4 Months	Improves networking efficiency and communication.
Phase 4	Mobile application, multilingual support, analytics dashboard, and recruiter recommendations	6 Months	Enhances accessibility, user experience, and scalability.
